The Story of Ice Cream

The English king, Charles I, enjoyed eating good food so much that he was known as a royal **gourmet**. Cooking interesting and different foods for him was a job for an **ingenious** man. Charles had such a clever man working for him, an Italian chef of great **repute**.

In Italy, the people were in the habit of bringing ice from the mountains to cool their drinks, and they had discovered that ice mixed with salt made a freezing compound. They used this compound to freeze cream. Once it was frozen, they added fruit.

The chef created this ice cream dish for the king, who was so excited about it he wanted to make it an exclusive dish for royalty. He paid the chef not to divulge his secret, but one of the palace cooks, who had seen everything, told everyone.

When ice cream reached America in the 19th century, it was a rare treat because it was not easy to make. President Madison's wife Dolly, an **adroit** and resourceful housewife, once ordered a frozen **confection** to be made for a White House banquet. She instructed the cook to use dairy cream and fresh strawberries. It was an immediate success, and to this day ice cream with large chunks of berries is often referred to as "White House."

Later, a clever New Jersey woman skilled in mechanical as well as **culinary** arts, invented the home, **hand-cranked** freezer. It contained a cylinder and paddle in which you put your cream, eggs, sugar, and flavorings. The cylinder was centered in a larger bucket filled with coarse salt. A crank was attached, and one turned and cranked for hours. It was a **tedious** chore, but remained in practice until the first ice cream plant was opened.
